CLOUD SOLUTIONS

Your ERP is the life blood of your rental business. Natural disasters, hardware failures, or man-made issues could easily stop your ERP from supporting your business. How long can you afford to do business without accessing your systems? Depending on your answer, Wynne can provide you the right backup solutions to meet your needs. Owning and managing systems to run your mission-critical applications requires skilled people and significant investment. This is why Wynne offers a variety of solutions for data management and back up that will keep your business up and running – even if your primary servers are not. We will develop a customized solution for you based on your recovery time requirements and budget. Options include back up of data, hosting of production servers and high availability.

DATA BACKUP

Affordable data backup for ease of mind

Back up your data via a resilient cloud-based backup solution. If you experience an unexpected data loss or data corruption, you have a copy of the data waiting in a safe remote location to get your service back up and running. Regardless of whether you host your data on your own premise or in a third-party data center, our cloud services can back up your data.

- ▶ Data is replicated daily to a server in a geographically diverse data center.
- ▶ In the case of an unexpected disaster a copy of your data will be available for download within 24 hours.
- ▶ This is a low-cost insurance policy against data loss and an excellent replacement for tape backup.

DATA BACKUP & DISASTER RECOVERY

Minimal disruption to get you back on track

Back up your data via a resilient cloud based backup and recovery service. In case of an unexpected system interruption your data is recovered to a stand-by system, allowing your company to get back up and running fast.

- ▶ Data is replicated daily via the cloud to a server in a geographically diverse data center.
- ▶ In case of an emergency, your data will be made ready and available on a stand-by system in 24 hours or less.
- ▶ We will manage your back up and provide a stand-by system to get your business up and running fast.

PRODUCTION & BACKUP

Focus on your business – let us manage your infrastructure & backup

Production & Backup allows you to run your primary mission critical application in a world class data center and backs up your data remotely in the cloud.

- ▶ Your primary production application is hosted in a fully managed state-of-the-art data center.
- ▶ The infrastructure is proactively monitored 24/7/365 by IT experts.
- ▶ We provide secure, fast and redundant connectivity to your systems.
- ▶ Data is replicated daily via the cloud to a server in a geographically diverse data center.
- ▶ In case of an emergency, your data will be made ready and available on a stand-by system in 24 hours or less.
- ▶ IT professionals will monitor and support your primary production needs and back up in case of a disaster.

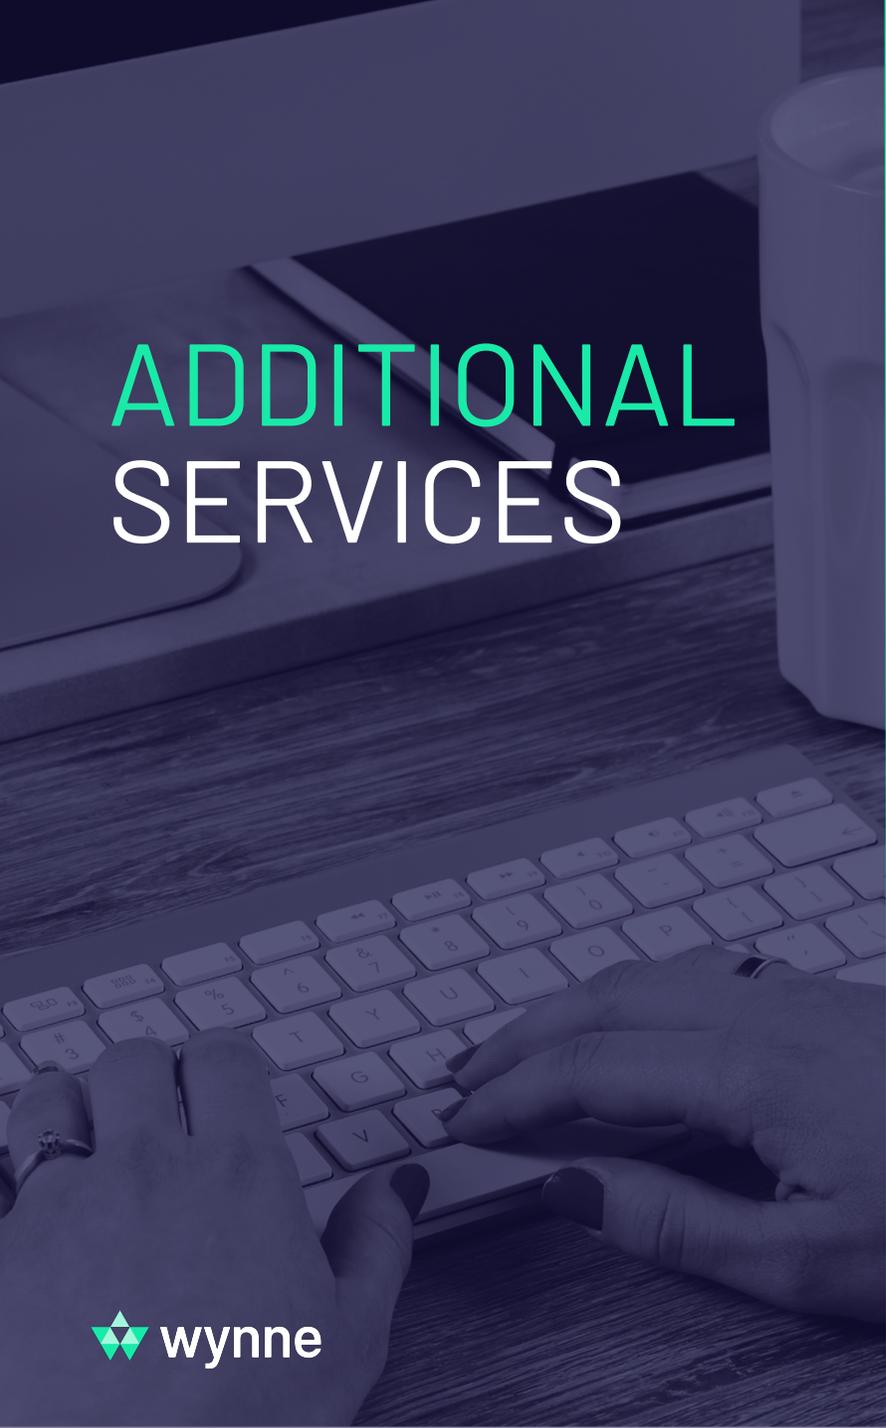

PRODUCTION & HIGH AVAILABILITY

Your applications need to be always available and restored fast if a disaster strikes

This premium service allows you to run your primary mission critical applications in a state-of-the-art data center. Your data is replicated both daily and real-time to geographically diverse locations so your data is always up to date. In the case of a failure you can roll over to your high availability system and be up and running in 4 hours or less.

- ▶ Your primary production application is hosted in a high performance infrastructure hosted in a state-of the art data center.
- ▶ Your data is replicated real-time and backed up on a high availability system in a geographically diverse location.
- ▶ In the case of an unexpected interruption or data disaster, a backup system will be made available for production use in 4 hours or less.
- ▶ Data is also replicated daily via the cloud to a server in a geographically diverse data center.
- ▶ This offering provides the most security for your business and will get you up and running in 4 hours or less if a disaster strikes

ADDITIONAL SERVICES

Your systems, our services

If you prefer to own the systems, we offer services which can ensure the systems are operating at peak performance, or we can completely manage the systems.

Services include:

- ▶ Quarterly health checks and updates
- ▶ Proactive monitoring and alerting
- ▶ Remote monitoring and management

WHAT'S RIGHT FOR YOU?

If you're unsure of what's the best strategy for your company, we can help. We will discuss your current recovery strategy and compare that to your desired results. Once we understand the gap between the two, we can establish the baseline of your needs and develop a complete solution that fits your business process and budget.
